

SUE THE AIRLINES

Your step by step comprehensive guide to demanding justice against airline mistreatment

This guide is arranged chronologically and will take you step by step through the entire process.

You will first learn about the common complaints, a bit about the Small Claims Court system and exactly how to go about filing your complaint.

You will then learn about how to prepare for your case, what to and what not to do in court and how to collect compensation from the airline company.

Keep a running tab of questions as you come across any. I would be glad to discuss them with you.

Do You Have a Beef With the Airline You Flew?

Who doesn't? If you are a frequent flier (even if you are not) I am sure you have had your share of frustrations with the airlines.

But I bet you haven't taken as much action as you would want to against them right? The main reason for that is the time and research involved in taking action.

Most times you have probably just given up and decided not to pursue your claim. Face it, it takes a lot of time, especially if you don't know where to start. We all know how responsive and cooperative airlines are ;-)

Maybe you have considered hiring a lawyer in the past? But by the time you figured out the cost of the attorney you probably didn't think your claim was worth pursuing.

What Have You Been Through?

How about a 3 hour flight delay due to mechanical issues with the plane? What about a missed connection because of a late flight? Damaged luggage? Lost luggage? I'll stop here.

These problems aren't so bad in their own. They become BAD when airlines refuse to compensate you for your troubles and make arrangements to make sure you get to where you are going as efficiently as possible with the least amount of inconvenience to you.

Unfortunately, abusive, Ignorant, Irresponsive and Irresponsible behavior is not uncommon to witness today in airline staff.

Congratulations on taking the first step to resolving your own issues effectively with airlines. This process doesn't need to take very long. It just requires education and awareness of what the laws are, what you are entitled to and how to go about the process.

Knowledge is power and more than half the battle for the subject of this book. After you have read this and understood the basic concepts, you will be able to take action against any inconveniences the airlines cause you from hereon.

We have let airline companies get by with so much and so many passengers are mistreated everyday. Add to that the lack of honest and open information available and we are talking hundreds of thousands of frustrated travelers who have absolutely no guidance to demanding recourse for mistreatment.

This book has one sole purpose, that is to guide and help fliers deal with airline companies who mistreat them and ignore them.

Common Complaints Against Airlines

Ever lost luggage and not gotten reimbursed for the full value?

Ever had a flight canceled and the airline decided to send you off to your destination in a bus without compensating you for your troubles?

What about if you decide to get on the next flight which is not till the morning and the airline refuses to pay for your hotel and meals?

These are some of the most common complaints that are frequently mishandled:

- Ticketing issues
- Not getting the proper mileage
- Prejudice/Discrimination
- Not honoring meal and/or disability requests
- Lost/Damaged bags
- Accident/Injury
- Issues with your pet
- Involuntarily being bumped
- Significant flight delay
- Canceled flight because of airline issue
- Compensation issues

Not Everyone is Treated Equally

Whether it's a forceful bump to the next available flight, getting ignored in a customer service line, being tossed around from one department to another like a tennis ball when you make a call or abusive mistreatment inside the plane....Why you?

Not everyone is treated fairly all the time. As unfortunate as it sounds, we are dealing with a business with a lot of human interaction and involvement. And each time you have humans involved, you face judgment calls, potential prejudice of any sort, bad moods and other "human factors".

There is a lot of "legal advice" in this book for free. However I am not a lawyer by any means. The information compiled in this book is from my personal experience, research and discussions with numerous private and airline industry attorneys.

Please consult your legal professional when in doubt. None of what I say should be construed as legal advice.

What Are You Going To Learn?

The objective of this book is not to cover petty issues that can be resolved by complaining at the agent's desk or by sending an email. You will be learning how to sue an airline company in Small Claims Court.

I will provide you with the specific information you need to take action against airlines that have mistreated you. With this information you will be able to file a complaint with the airlines without having to hire an expensive attorney.

There is a lot of wrong information out there about Small Claims Courts and how one can file and pursue a complaint. Add to this

wide unawareness about the process and you can see why airlines have been getting away with so much.

The Small Claims Court process has definitely been the best way for me to collect recourse against airlines that have mistreated me. The good news is that you can do it too on your own and it doesn't cost very much (just a minimal filing fee). In fact the court will ask the airlines to reimburse your court fees after you have won your case.

Airlines hate Small Claims Courts. Trust me. They don't want to send their reps there. You will also learn how you can sue anywhere service was provided. This is something you need to be clear on. There is a big misunderstanding on where to file. Filing in the right State is very important.

Finally, I will tell you about the main authoritative bodies that overlook airlines. I will provide you with their contact information so that you will be able to contact these agencies and officials and express your concerns.

Here is the main take away and I will give it to you right now. Most people just walk away from their grunts and grudges and prefer not to deal with the airlines. However, whatever your situation is, in order to get results, you **MUST TAKE ACTION!** Do it for others if you don't want to do it for yourself.

Who am I to tell you all this?

I am certainly not an ex airline executive or an attorney. I am a frequent flier who has achieved the highest or second highest status with 7 different airlines.

My name is Sunil and I was a corporate consultant with a top global firm for a long period of time. My work required me to travel all over the place domestically and internationally to help my clients all around the world.

To give you a bit more comfort that this book is not written by a high school graduate who works at a tool and die shop, I graduated from a top 10 business school, I hold a masters degree and hold several certifications in my career field.

Why else would everyone fly me all over the place? They not only paid my airfare, but my hotel, car, gas, meals and to some degree even entertainment. Traveling is not cheap – and I'm sure I am preaching to the choir.

I flew 110,000 miles the year I wrote this book. You may have traveled more than me, but you can't deny that 110,000 of traveling will teach you a thing or two about the "rules of the game". Right?

For four years in a row, I broke the 100,000 mile mark. In the later half of the four year period, I was traveling every week - In on Monday, out on Friday. Add to that weekend trips here and there and we are talking a lot of traveling. Heck I should have just bought my own jet like John Travolta did.

If you contact me today there is a very good chance that I am still traveling quite a bit. Just can't get it out of my system I guess. It has become a lifestyle of one sort.

Why Did I Write This Book?

Because there wasn't one when I needed it most! I learned everything the hard way and it took me a long time to master the process. There is simply a lot of demand for this information as so many people are looking for practical easy to follow guidance. Learn from my mistakes and experiences.

Airlines will keep doing what they do if action is not taken against them. I am no politician or rich lobbyist so this is my best effort to bring reform to airline service standards. I figured if they get sued enough and have to settle enough suits they will just have to fix underlying root cause.

The corrective action is very simple. Take care of your passengers! Those passengers that pay hundreds and thousands of dollars to your company! I am not shouting at you. These are words for the airline companies.

I have met so many that are just absolutely frustrated with the airline companies. This book is my effort to get back at these companies and make sure our voices are heard. I have priced this book very low to make it affordable to everyone.

The proceeds are mainly to support the cost of this website development, the server space I rent, the domain name and the few dollars I spend maintaining it and bringing awareness to it.

Together our voices are much louder. THESE AIRLINES NEED TO LEARN THEIR LESSON AND SOMEONE HAS GOT TO SPREAD THE WORD OUT THERE! THEY HAVE BEEN GETTING AWAY WITH SO MUCH FOR ALL THESE YEARS!

Your Main Objectives

This book is part education, part inspiration. Your objective is to learn this useful and valuable information so you can be heard and compensated for your troubles. Education is key to pretty much everything in this world. And execution is its sister. This book provides you with both.

When you are done with this book you will have a good understanding of what a Small Claims Court is and how to use it to your advantage when seeking recourse from airlines that have mistreated you.

It's a quick process and much easier compared to higher levels of court. You can do everything yourself for as little as \$50. There is no need to hire an attorney and spend hours, weeks and months figuring out where to start and where to go from there. You have everything you need in this book.

Airfares continue to increase and yet the quality of service continues to decline. You will be equipped with the knowledge necessary to understand and exercise your legal rights and sending a loud and clear message to the airlines that their carelessness, irresponsibility and ignorance will no longer be tolerated.

Inconvenience is the Last Thing You Need!

As if traveling is easy to begin with right? The last thing you need when traveling is some inconvenience caused by the airlines because of some oversight or sheer ignorance.

I see so many people get angry but yet they are so helpless they don't know what to do, where to go or who to talk to express their anger. You know what I do when I see these folks?

I tell them not to waste their energy and get angry about the situation. You should see the look I get. I hand them a card and tell them to go to my website, understand that they are not alone in this boat and then to take their complaint to the legal authorities that will certainly catch the airlines' attention. The Small Claims Court is by far the best way to get your message across to the airlines.

This step-by-step guide, the only one of its kind, will help you **RESEARCH, EXECUTE & PREPARE** your airline complaint in a manner that almost guarantees compensation from the airline company before you even go to court. Remember, knowing what to do, when to do it and how to do it are the critical factors that will determine your success; this guide will equip you with exactly that information....
